

Professional Summary

Flutter Developer with **2+ years** of experience building high-scale, multi-tenant SaaS applications serving **50,000+ active users**. Specialized in Clean Architecture and BLoC to develop maintainable, enterprise-grade mobile solutions. Reduced crash rates by **20%** and accelerated development cycles by **60%** through CI/CD automation and observability-driven engineering practices. Experienced in fintech integrations (Stripe, Razorpay, POS) and production-grade deployment workflows using Codemagic and Shorebird OTA. Recognized with the **"Deadline Dynamo"** Award for delivering mission-critical features ahead of schedule without compromising quality.

Technical Skills

- **Languages & Frameworks:** Dart, Flutter (Android/iOS/Web), Java, SQL.
 - **State Management & Architecture:** Provider, Bloc, GetX, Clean Architecture, SOLID Principles, MVVM.
 - **Backend & APIs:** RESTful APIs (Dio), Firebase (Firestore, Cloud Functions, Auth), Node.js, GraphQL.
 - **Mobile Ecosystem:** Push Notifications (FCM, APNs), Shorebird (OTA), Deep Linking, App Store/Play Store Deployment.
 - **Tools & DevOps:** Git, CI/CD (Codemagic, GitHub Actions), Husky (Git Hooks), PostHog, Sentry, Figma.
 - **Payments & SDKs:** Stripe, Razorpay, Cashfree, PayPal, Agora (Video), Algolia, OneSignal.
-

Experience

Jr SDE (Flutter Developer)

Knovator Technologies Pvt. Ltd. | Jan 2024 - Present

- **Architected** and maintained **3+ scalable Flutter-based SaaS** mobile applications and delivered solutions for **4+ high-profile clients**, utilizing **Clean Architecture** and the **BLoC pattern** to improve code maintainability and modularity by **35%**.
- **Engineered** robust **REST API** integrations and **Firebase** services to facilitate real-time data synchronization and secure authentication workflows for a global user base of **50,000+**.
- **Spearheaded** the implementation of secure payment gateway ecosystems (**Stripe, Razorpay, PayPal, Cashfree**) supporting high-volume in-app transactions with a **99.9%** success rate.
- **Improved** performance by reducing app startup time by **30%** and minimizing crash rates by **20%** through observability-driven optimization.
- **Automated** deployment workflows by designing **CI/CD pipelines** via **Codemagic**, reducing manual release effort by **40%** and significantly accelerating bi-weekly deployment cycles.
- **Developed** high-reliability notification engines using **FCM and APNs** with customized native background logic, driving a **25% increase in user engagement**.
- **Orchestrated** end-to-end application lifecycles, managing **Google Play Console** and **App Store Connect** to ensure consistent, zero-downtime production releases.
- **Collaborated** within an **Agile Scrum** environment, contributing to sprint planning and implementing **Husky Git hooks** to reduce Pull Request cycle time by **60%**.
- **Recognized** with the **"Deadline Dynamo" Award (2025)** for exceptional efficiency in delivering mission-critical features ahead of schedule without compromising code quality.

Jr SDE (Flutter Developer)

Panara Studios Pvt. Ltd. | Sept 2023 – Nov 2023

- **Delivered 2 production-ready Flutter applications** end-to-end, overseeing the full SDLC from initial feature scoping to successful **App Store and Play Store** deployment.
- **Architected pixel-perfect, responsive UI** components based on complex **Figma designs**, ensuring a seamless and consistent user experience across high-density Android and iOS devices.
- **Collaborated** in a high-velocity environment with backend engineers and designers to resolve critical post-release bugs, maintaining a **98%+ crash-free session rate**.
- **Optimized API integration layer** to handle asynchronous data streams, reducing screen load times and improving overall app perceived performance.

Freelance Flutter Developer | Jan 2021 – Aug 2023

- **Architected and deployed 10+ production-grade Flutter applications** across Food Delivery, E-commerce, and Service-based sectors, maintaining a **4.8/5-star average user rating** by prioritizing high-fidelity UI and 60 FPS performance.
- **Engineered complex full-stack ecosystems** by integrating **Firebase (Firestore/Auth/Cloud Functions)** and **RESTful APIs (Dio)** to support real-time order tracking, secure authentication, and live data synchronization.
- **Implemented secure payment infrastructures** (Stripe, PayPal, Cashfree), processing over **\$10,000+ in digital transactions** with zero security vulnerabilities and a **99.9% transaction success rate**.

Key Projects

Omniva Telehealth (Healthcare SaaS) | Flutter, Firebase, Real-time Video, Payment Gateway Integration, Razorpay

- **Architected** a scalable, multi-tenant telehealth platform supporting end-to-end appointment lifecycles, **Agora-powered video consultations**, and encrypted digital prescriptions.
- **Engineered** secure patient–doctor payment workflows via **Stripe and Razorpay**, ensuring 100% digital transaction flows and financial data integrity.
- **Designed** role-based access control (RBAC) and high-reliability **FCM notification** engines to ensure mission-critical communication across doctors, patients, and admins.

Artha Job Board (Recruitment SaaS) | Flutter, Firebase, Subscription Payments

- **Developed** a mobile-first recruitment engine enabling seamless job postings, candidate applications, and recurring employer subscription models.
- **Engineered** premium listing workflows and automated billing, contributing to direct revenue generation through optimized **Stripe and PayPal** integrations.
- **Optimized** candidate engagement by integrating real-time notification triggers for application status updates and employer interactions.
-

Restaurant & Food Ordering System (SaaS) | Flutter, POS Integrations, Analytics

- **Architected** a high-scale, multi-outlet restaurant management ecosystem supporting real-time order lifecycle tracking and synchronization.
- **Synchronized** online and in-store order data by integrating multiple **POS systems**, utilizing **PostHog** behavioral analytics to drive data-informed operational improvements.
- **Implemented** customized, **persistent background** notifications (OneSignal/FCM/Openbeep) for order tracking, significantly enhancing operational responsiveness and user satisfaction.

Education

Bachelor of Technology

Walchand Institute of Technology, Solapur
